

Dear colleagues,

It is my great honor to invite you to participate in the international symposium "1st Days of endocrinologists and diabetologists of the Republic of Srpska", which will be held December 1 to 3, 2023, in a hybrid manner at the hotel Bosnia, Banja Luka.

The symposium is organized by the Association of Endocrinologists and Diabetologists of the Republic of Srpska in cooperation with the University Clinical Center of the Republic of Srpska and the Faculty of Medicine of the University of Banja Luka.

The latest diagnostic and therapeutic findings in the field of endocrinology and diabetology will be presented at the meeting.

Best Regards,

President of the Association

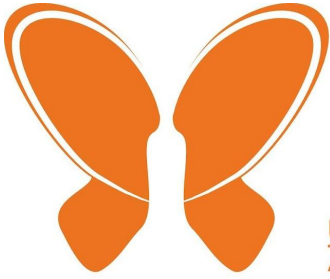

Prof. Dr. Aleksandra Marković, associate professor, specialist in internal medicine, subspecialist in endocrinology, primarius

#### ABOUT SYMPOSIUM

The organization of the 1st Days of endocrinologists and diabetologists of the Republic of Srpska has several important aspects:

1. Education and exchange of knowledge: This event will enable endocrinologists and diabetologists from the Republic of Srpska, and the entire region, to meet and exchange the latest information and experiences regarding diagnosis and treatment of endocrine disorders and diabetes. This contributes to the improvement of expertise and practice in the field of endocrinology and diabetology.
2. Raising awareness about endocrine disorders and diabetes: This event will help raise public awareness of the importance of prevention, diagnosis and adequate treatment of endocrine disorders, including diabetes. It will also contribute to better patient care and reduce the stigma surrounding these conditions.
3. Networking and cooperation: Days of endocrinologists and diabetologists are designated to provide networking opportunities, cooperation between health and research institutions, and exchange of information on best practices. It will also improve health care and research in the field of endocrinology and diabetology.

Days of endocrinologists and diabetologists play a significant role in improving health care and information about endocrine disorders and diabetes in the Republic of Srpska.
